amazing, especially with the support teams, they always solve the

gueries within 24 hours and their staff is available 24\*7 for support, ...

Products: Shipsy Route Planning and Optimization

Software, Shipsy Multi-Carrier Management, Shipsy

Customer centric culture & positive customer feedback

### Single Platform for End-to-End Logistics Orchestration

- Automate processes to plan, procure, execute, track and audit transportation for every shipment
- Manage hub-to-hub, hub-to-store, and last-mile deliveries all on one platform
- Assign, track & manage deliveries across own fleet, market vehicles, and 3PLs

# **Generate Optimal Dispatch Plans**

- Consolidate loads for optimal FTL & PTL mix and automatically select the best-suited carrier & contract
- Create optimal routes and vehicle mix based on order, vehicle, and objective constraints reducing TAT & market vehicle requirement
- Use a real-time dashboard to optimize transportation and capacity planning based on cost, distance and vehicle requirement reduction etc.

# Automate Transporter Indent Management

- Easily upload vendor lists via Excel or platform and masters of vendors with rate contracts, cost structure, capacity of vehicles, available geography and more
- Prioritize vendors at regional and a pin code level as L1, L2 or L3
- Raise requests to vendors through our portal, WhatsApp, SMS, or email, allowing them to respond with vehicle and driver details
- The system automatically cascades to L2 & L3 vendors based on your predefined prioritization in case L1 vendor doesn't respond within a specified time

#### **Drive Intelligent Multi-Carrier Management**

- Deploy a single API and ready-to-use integrations to collaborate with multiple 3PLs
- View, manage and track order statuses and carrier KPIs in real time on a unified platform
- Use an Al-powered order allocation engine to assign orders to 3PLs based on objectives like 'cheapest,' 'fastest,' 'best customer rated,' etc
- Auto-extract order info, get standardized label format accepted across LSPs, get indicative shipment costs & receive proactive alerts on deviations
- Benchmark 3PL performance, and analyze metrics important to you

#### **Provide Real-Time Visibility to Stakeholders**

- Track live location and status of shipments across carriers via SIM, GPS or App-based tracking
- Enable B2B/B2C businesses to track shipments using our merchant portal and provide end customers an 'Uber-like' delivery experience real-time tracking & ETAs
- Notify customers at every stage of delivery through Email, SMS or WhatsApp

#### **Deploy AI-Powered Address Intelligence**

- Validate addresses against a global database and receive accurate recommendations for invalid entries.
- Auto-correct pin/area codes using geospatial data, and find the nearest serviceable code for non-serviceable areas.
- Geocode addresses to get the exact latitude/longitude or use reverse geocoding to get the address from coordinates

# Manage & Resolve Incidents Using Shipsy's Al Co-pilot

- Shipsy's intelligent engine analyzes operational KPIs 24x7, detects efficiency breaches, and raises immediate alerts
- Incidents are auto-assigned to the most suitable team member, with detailed analysis available at specific object or entity levels (e.g., hub/ rider)
- Gain a comprehensive view of all your operational metrics in a single, userfriendly mobile app & analyze all incidents on a single page

### In-Depth Analytics on Logistics Performance

- Evaluate vendor performance, 3PLs, vehicles, drivers, and failed deliveries for improved decision-making
- Receive real-time alerts on KPI breaches and incidents using AI and predictive intelligence, and forecast future demand to optimize logistics operations.
- Use ShipsyBl to analyze critical KPIs like On-Time Vehicle Placement, Time Spent at Warehouse, Delivery Schedule Adherence, Route Deviation, Vehicle Capacity Utilization etc.

#### Streamline Invoice Reconciliation & Audit

- · Generate digital invoices and audit invoices with a 4-way maker-checker reconciliation
- Automatically calculate penalties in case of SLA breaches
- · Create interactive dashboards and visualize data using ShipsyBl

#### **Drive Superior Digital Customer Experiences**

- Set up automated SMS, WhatsApp and email communications that are triggered when a shipment moves along different stages of delivery
- Use WhatsApp chatbot to communicate with customers
- · Allow customers to track delivery progress by sharing live-tracking links before delivery
- · Send "now arriving" notifications to customers via SMS, WhatsApp or API when orders are about to reach
